

Separating Storm Debris

Debris should be separated in the below categories and placed curbside, without blocking fire hydrants, roadways, storm drains, mailboxes, utility poles, etc.

Do Not Stack or Lean - Placing debris against, near or under trees, poles, hydrants and other structures makes removal difficult.

1

Household Trash

Trash and bagged leaves are NOT collected with storm debris. Continue with your normal collection schedule.

2

Vegetative Debris

Limbs, Branches, Logs, Plants, etc.
Note: Please bag leaves, twigs and other small items.
